Representatives from Roanoke area industries today should know more about how to keep from getting electrocuted. (ROLL FILM)

About 40 of them took a four-hour course yesterday at the U.S. Marine Corps Reserve Training Center. (SHOW FILM)

It was one of a series being sponsored this week by the Virginia Manufacturer's Association in cooperation with the Virginia Dept. of Labor and Industry.

Yesterday's session was in charge of James T. Green a safety representative of the state Labor Department.

Green explained how portable electrical equipment can be shorted out, eneggizing the case and in many ~~xxxx~~ instances electrocuting the person using it. Other subjects to be taught this week include fire prevention, house keeping, fire protection and materials handling.
