

(Start film)

To bag it or can it, that is the question...and City Council's Garbage Committee has deferred a week recommendations on Paper Garbage ~~2~~ Bags.

(Show film)

Postponement action on the matter came at a Committee meeting this morning with City Manager Owens.

Lawmakers Wheeler, Pollard and Dillard will wait until a thrd public hearing called by Mayor Stoller is finished Monday. That's when residents who do not live in the test areas can give their views on the proposed system. The Committee has approved a list of what members feel are the benefits under the proposed system. That list will be distributed Monday night. Generally, those ~~has~~ heard from so far, favor the paper can method of collection. However, there have been a number who don't want any part of the plan, and have said so in no uncertain terms. It's believed Council will hear more from this group before the matter is settled one way or the other.
